2018-2019 CONSTRUCTION

Travellers in the area can expect to see preparation work like vegetation clearing, grading along shoulders and utility relocations throughout the project area as we continue to prep for upcoming construction activities throughout the interchange. Construction activities are scheduled to begin in the fall of 2018 and during 2019.

Construction Alert: Due to inclement weather in the fall of 2018, final grading and gravel placement for the finished roadway could not be completed for the new Kansas Avenue realignment in the southwest quadrant of the I-80/I-380 interchange. Work will begin in spring after winter weather subsides. The new Kansas Avenue road is anticipated to be open on or before June 1, 2019.

Additional construction activities planned for 2018-2019 include:

- Grading work on westbound I-80 to northbound I-380 and eastbound
