Emergency Management
What is Emergency Management

Process of ensuring that an organization is in a state of readiness to contain the effects of a disastrous event and has the capability and resources to continue to sustain its essential functions without being overwhelmed by the demand placed on them.
When it comes to planning for emergencies, institutions are more focused on **response** than on continuity or recovery.
Emergency Preparedness Audit

Training

College and Department Business Continuity
   NFPA 1600

Building Emergency Action Plans (EAP) / Evacuations
   OSHA 1910.38 requires EAP to be created and communicated to all employees with minimum required elements including procedures for evacuations and reporting for a fire or other emergency as well as exit route assignments.
