Power Plant Maintenance & Reliability Manager (Utilities/ Energy Manager)

The University of Iowa department of Facilities Management, Utilities and Energy Management, is seeking a maintenance and reliability manager to lead the maintenance department at the University of Iowa power plant. This position will manage power plant facilities maintenance staff to improve maintenance processes and procedures, track performance of the maintenance organization and ensure availability and reliability of power plant equipment and systems. Review, develop, and implement processes to improve the effectiveness and efficiency of the university power plant facilities. This position will ensure projects are delivered in accordance with design specifications to improve power plant safety, reliability, and efficiency.

The maintenance unit includes in-house mechanical, electrical, and instrumentation trades staff as well as maintenance planners, controls programmers and maintenance contractors. The maintenance unit is responsible for all predictive, preventative, and corrective maintenance activities. The project execution unit includes utility system specialists who coordinate with project managers, contractors, and power plant staff on utility project execution.

Qualifications:

Required:
- Master’s Degree in Engineering or related field or a Bachelor’s degree in Engineering with an additional 3 years’ related experience.
- 3-5 years of operations or maintenance leadership experience in a utility or industrial facility.
- Experience with implementing maintenance best practices in a utility or industrial facility.
- Related supervisory experience.
- Excellent written and verbal communication skills.
- Ability to work with a diverse group of staff at all levels of an organization.

Desired:
- Experience implementing risk based maintenance strategies.
- Experience implementing predictive maintenance programs.
- 5-7 years of experience with process improvement.
- 5-7 years of experience with capital project coordination.
- Ability to be registered or current registered Professional Engineer in Iowa.

Salary commensurate with experience and qualifications, including an excellent benefit package.
