Members Present: Jerry Anthony, Greg Black, Ryan Delves, Carol Haack, Larry Robertson, Christine Rutledge-Russell, John Scott, Mark Young

Members Absent: Tom Kruckeberg

Others Present: Shawn Albaugh Kleppe, Rod Lehnertz, Larry Wilson, Glen Mowery

Call to Order: Mark Young called the meeting to order.

Previous Minutes: Minutes of the August 3, 2009, CPC meeting were approved as distributed.

Old Business: Larry Wilson provided a brief update of past projects that have been reviewed by the Campus Planning Committee. They included the installation of a handrail on the east entrance staircase of the Old Capitol, lighting of the Carver College of Medicine recognition signs, installation of the Pentacrest outdoor warning tower, soil storage for the Iowa Institute for Biomedical Discovery project and the connective bridge between the Iowa Institute for Biomedical Discovery building and the Medical Education Research Facility.

Discussion / Action Item(s):

Water Tower Logo

Interest in placing a Hawkeye logo on the water tower located near the UI Hospitals and Clinics has reemerged. No formal request has been made, but this topic was presented to the Campus Planning Committee for their guidance in a proactive measure. This item has been before the Campus Planning Committee before and it has been the consensus of members not to endorse the placement of logos on the water tower.

Discussion at this time included the current precedence for placing logos on objects such as the water tower and how this relates to the UI signing policy, the cost of placement and maintenance of logos on the water tower, potential problems with water quality due to absorption of heat from darkened surfaces of the water tower, and funding such a project in the currently economy.

The Campus Planning Committee unanimously recommended maintaining the current neutral space, but if a logo was endorsed by UI Administration, it is the consensus of the Campus Planning Committee that it be small and discreet perhaps referencing past displays on the water tower.

Campus Signing / Wayfinding Study

Larry Wilson brought the Committee up-to-date on the Campus Signing/Wayfinding Study, which is in the late design development phase. Incorporating feedback from the Steering Committee, a campus-wide representatives group and others, consensus has been given on all but a few specific building sign designs. Specific items for discussion relating to these building and entrance signs were presented.
The Committee endorsed the current design proposal in principle at this time.

**Nursing Building Window Tinting**

Glen Mowery presented a proposal from the UI Energy Hawk Team to apply a window tinting to the south, east and west facing windows of the Nursing Building. He provided three samples of tinting with the approximation of energy savings each would provide and product payback estimates.

Discussion included the application process proposed and aesthetic issues of the building.

The Committee endorsed the lightest tinting option presented (FR70) and further suggested that the tinting be applied to the remaining windows on the north side should maintaining the symmetry of the building’s window tinting become an issue.

**Work Session Reports**

Time did not allow for Work Session Reports.

The meeting was adjourned at 3:00 p.m.
